Specific Elements

Description of Work:

Increase funding and LOE:

Justification:

- 1) Increase funding on the project to cover 2011 data gaps filling efforts for a draft HRS package. Those included supplemental sampling of Gold King 7 Level mine waste pile, calculation of waste pile volume, mineralogical evaluation of mine waste pile materials, complete surface water pathway documentation, fisheries evaluation, wetlands delineation and sensitive environment identification, plus a more detailed reporting of the 2011 wetlands delineation to meet HRS needs. The wetlands delineation subcontractor also had substantially more comments to respond to. Additionally, costs that were not included in the original TDD amount, but were within scope included data validation of the supplemental analytical data and more involved response to comments on the data gap filling Trip Report. Lastly, the subcontractor's invoices have consistently come in later than expected, which has made it difficult to keep up with the correct amounts to modify the TDD.
- 2) Allow for TDD closeout.

New Deliverables: none – remaining HRS deliverables requirements moved to the new Upper Cement Creek HRS package TDD 1111-0009
